📄 PROFESSIONAL SUMMARY

A dynamic EdTech leader and academic professional with over a decade of experience driving technology-enabled learning, curriculum innovation, and large-scale program management across higher education and industry. I specialise in building digital learning ecosystems, leading cross-functional teams, and delivering impactful STEM, AI, IoT, and robotics programs through roles with The Innovation Story (Amazon Future Engineer Makerspace), Phi-Grid Elite EdTech, and top universities including Manipal, Sikkim Manipal, and Jain. With deep expertise in instructional design, online and blended learning, content engineering, and NEP-aligned curriculum development, I have successfully designed and managed multi-disciplinary programs across MBA, BCA, MCA, Engineering, and K-12 domains. My work blends educator empathy with strong engineering and analytical skills, enabling me to create scalable learning strategies, mentor faculty and students, strengthen academic operations, and implement data-driven improvements. Known for combining technical depth with academic leadership, I bring a mission-driven approach to building inclusive, future-ready learning experiences and strengthening institutional impact.

📜 CERTIFICATES

Design and Development of Self-Learning Materials for Distance, Online and Blended Learning — IGNOU

Digital Technologies Case Studies: AI, IoT, Robotics, Blockchain — *linkedIn Learning*

Google Educator Certificate — *Level 1*

Google Educator Certificate — *Level 2*

Certified Solidity Developer — *Pursuing*

Certified Blockchain Professional — *Developer_Pursuing*

Generative AI Learning Path from Google — *Generative AI Fundamentals • Introduction to Image Generation*

ChatGPT for Beginners: Using AI for Market Research — *Beginner*

🧩 HIGHLIGHTS

- Spearheaded the development of **innovative robotics projects**, driving **student engagement** and **creativity**.
- Enhanced **operational efficiency** by implementing **streamlined workflows** and **resource management strategies**.
- Facilitated **mentorship training programs**, contributing to the **professional growth of mentors**.

- Cultivated a **network of educators and mentors** through **collaborations** and **professional development initiatives**.
- Seamlessly managing **end-to-end projects** for diverse degrees like MBA, BBA, MCA, BCA, MCom, and BCom with **strategic oversight**, ensuring each program's unique needs are met from inception to completion, fostering **academic excellence and operational efficiency**.
- **Strategic Program Development**: Lead the creation, implementation, and continuous improvement of B2C and B2A programs, ensuring alignment with company goals.
- **Content Strategy**: Develop and implement a comprehensive content strategy, ensuring high-quality and relevant content across all programs.
- **LMS and Data Amangement**: Managing, Authoring, Curating Content, Updating content, and storing data.
- **Quality Assurance**: Monitor program and content effectiveness, implementing continuous improvement strategies.
- **Stakeholder Engagement**: Engage with educational institutions, clients, and internal stakeholders to tailor programs to specific needs.
- **Leadership**: Lead and manage a team of trainers, content developers, and program managers.
- **Developed** course material on different **LLM architectures**, such as Llama3 and Gemma 2, and tools like.
- **Designed courses** on identifying and quantifying AI project value and translating business objectives
- **Taught basics** of AI agents, Langgraph, and Autogen for multi-agent collaboration and task
- Delivered Training on **Power BI** in multiple colleges and industries
- Adjunct Faculty at **Sikkim Manipal University** handling subjects Java Programming, Computational Mathematics, Python Programming.
- Adjunct Faculty at **Manipal University Jaipur** handling Data Scraping, Unstructured Data Analysis, and Mobile Application Development, Python Programming, Computer Networks, Microcontroller Architecture, IoT
- Worked with **Tata Steel** to provide **IoT Training** for their Jamshedpur Campus
- **Developed** Content for **5G and Blockchain Professional Certification**
- **Leading** the **Sikkim Manipal University's MCA** content for online program
- Using **Agile Methodologies** to attain Project Timelines
- Developed **Project Dashboard** to help maintain the reports of the Project
- Recorded Video Lectures on **Machine Learning** for Amity University
- Developed Content on **React JS** for Simplilearn
- Developed Content on **Big Data Analytics** for Amity University
- Worked as a Lead SME on a project for **BPTN, US** client on **Full Stack Bootcamp**
- Hands-on with **Power BI, Tableau, and Excel** in **Story Telling with Data**
- **Researched** on Blockchain developments and building a curriculum around the **specialization for BCA level course**
- Experienced in **Mobile Application Development** using **React Native** and other popular frameworks, with a strong understanding of **UI/UX design principles** and **platform-specific guidelines**
- Work with **International Clients** to build industry-standard curriculum for **Full Stack Development**
- Worked with **ReactJS** and related technologies such as **Redux, TypeScript, and Next.js**.
- Proficient in front-end development tools like **HTML, CSS, JavaScript, and jQuery**.
- Building a web-based platform using **Django Framework**
- Handled **Python, Linux, Basic Electronics, Arduino, Embedded C, IoT System Design, Digital System Design, Micro-controller and Microprocessors, Analog Electronics Design, Signal Processing, and Fundamentals of Digital Electronics**.
- Conducted Multiple **Webinars** on **IoT, Embedded Systems, and their impact** in the assigned college and across colleges nationwide.
- **Lead a team of 15** to **develop, test, and implement the curriculum** in various schools across India.
- In charge of developing **hands-on engineering-based curriculum** for **K-12 schools**.

- Developed and executed Curriculum for Hands-on Engineering across Schools in India; including the **American School of Bombay, and Heritage Experiential School, Delhi.**
- Guided **18 groups** of students for their final semester projects.
- **Delivering Skill Development Programs** on **IOT** subjects for students and faculties **PAN India.**
- **Content Engineering** (Flow of conceptual knowledge delivery for online courses).
- **Curriculum designing** for specialization degree B.Tech: IoT, and Electronics based on **NEP** (National Education Policy) framework.
- **Studio-based recording** of lectures for online degrees (BCA and MCA).
- **B2C training** for courses on **Softskills, IoT, Embedded Systems**
- **Rendering extended training support** for public speaking training sessions to Rotaract Club of Navi Mumbai Industrial Area.

WORK EXPERIENCE

11/2022
India

Chief Academic & Program Strategist, Phi-Grid Elite EdTech Pvt. Ltd

- Lead national academic content and learning design initiatives for 40+ university programs across MBA, BCA, MCA, and Engineering.
- Directed a 30+ member cross-functional team (SMEs, ID, QA, and faculty) to deliver curriculum aligned with NEP-2020 standards.
- Implemented Agile-based project tracking and analytics dashboards to monitor 500+ content assets and faculty deliverables.
- Mentored 50+ educators in robotics pedagogy and digital learning tools; delivered capacity-building programs for Tata Steel, Amity University, and Simplilearn.

11/2024 – 05/2026
Bengaluru, India

Senior Program Manager,

The Innovation Story - Amazon Future Engineer Makerspace Lab

- Led day-to-day operations of the **Amazon Future Engineer Makerspace Lab**, managing workflows, resources, and **multiple concurrent STEM and robotics projects.**
- Mentored and supervised a team of **5 Robotics Researchers and Mentors**, fostering a **collaborative and innovation-driven** environment.
- Provided end-to-end coaching for **FIRST Global Challenge (FGC)** and **World Robot Olympiad (WRO)** teams, overseeing **robot development, training schedules, and competition strategy.**
- Guided students in building **advanced robotics projects**, delivering personalised technical mentorship and structured progress assessments.
- Designed and implemented **hands-on robotics curriculum, project-based modules, and competition-aligned lesson plans** in collaboration with curriculum teams.
- Conducted **workshops** and **technical masterclasses** to strengthen students' **analytical, engineering, and problem-solving skills.**
- Implemented strict **safety protocols** and ensured seamless **maintenance, calibration, and troubleshooting** of lab equipment and robotics systems.
- Maintained comprehensive **documentation and reporting** including project logs, lesson plans, and **competition readiness reports** for program evaluation and stakeholder communication.

07/2024 – 11/2024
Chennai, India

Senior Manager - Content and Program Strategy, Hyper Launch

- **Strategic Program Development:** Lead the creation, implementation, and continuous improvement of B2C and B2A programs, ensuring alignment with company goals.
- **LMS and Data Amangement:** Managing, Authoring, Curating Content, Updating content, and storing data.
- **Content Strategy:** Develop and implement a comprehensive content strategy, ensuring high-quality and relevant content across all programs.
- **SME and Trainer Management:** Recruit, manage, and train SMEs and trainers, ensuring effective content delivery.
- **Quality Assurance:** Monitor program and content effectiveness, implementing continuous improvement strategies.
- **Stakeholder Engagement:** Engage with educational institutions, clients, and internal stakeholders to tailor programs to specific needs.
- **Leadership:** Lead and manage a team of trainers, content developers, and program managers.
- **Market Research:** Stay updated with industry trends and incorporate new methodologies into program and content development.

06/2022 – 07/2024
Bangalore, India

Associate Content Developer, UNext Learning Pvt. Ltd

- Seamlessly managing **end-to-end projects** for diverse degrees like MCA and BCA with **strategic oversight**, ensuring each program's unique needs are met from inception to completion, fostering **academic excellence and operational efficiency**.
- Leading the **IT** team under the **Academic Team** to deliver content within **aggressive timeline**
- Worked with **Tata Steel** to provide **IoT Training** for their Jamshedpur Campus
- Developed Content for **5G and Blockchain Professional Certification**
- **Leading the Sikkim Manipal University's MCA content** for online program
- **Managing Content** for Sikkim Manipal University, Manipal University Jaipur, Manipal Academy of Higher Education, Certification Course provided by UNext, and Content Initiatives
- Closely working with the **Project Management Team** to help complete the project on time
- Developed **Project Dashboard** to help maintain the reports of a Project
- Closely Working with the **Marketing team**, providing them **support with content for social media**
- Closely Working with faculties of the **Manipal University Jaipur, Manipal Academy of Higher Education and Sikkim Manipal Univeristy** to enhance the scope of online courses
- **Developed Content** on **Embedded Systems, IoT** for B2B Clients

08/2022 – present
Bangalore, India

Adjunct/Visiting Faculty,

Manipal University Jaipur, Sikkim Manipal University, Jain(deemed-to-be University)

- Handling **IOT** for **MCA** ay Manipal University Jaipur
- Handling **Mobile Application Development** for **BCA** at **Manipal University Jaipur**
- Handled **Unstructured Data Analysis** for **MBA Data Science** Specialisation at **Manipal University Jaipur**
- Handled **Data Scrapping** for **MBA Data Science** Specialisation at **Manipal University**

- Handled **Internet of Things System Design** for **BCA IOT Students** at **Jain(deemed-to-be University)**
- Handled **Web Design and Development** for **BSc Gaming Students** at **Jain(deemed-to-be University)**

06/2023 – present
Bangalore, India

Freelance Trainer and Content Developer

- Delivered training on **Robotic Process Automation** at **R.V Institute of Management**
- Delivered Training on **Power BI** at **St. Joseph College of Commerce**
- Developed Content around **Data Wrangling** for an Online Course

08/2022 – 08/2023
India

SME Consultant, Hurix Learning Pvt. Ltd.

- **Recorded Video Lectures** on **Machine Learning** for **Amity University**
- Developed Content on **React JS** for **Simplilearn**
- Developed Content on **Big Data Analytics** for **Amity University**
- Working as a **Lead SME** on a project for **BPTN** client on **Full Stack Bootcamp**
- **Develop curriculum** for the **Bootcamp** in accordance with the guidelines provided by the client
- Develop detailed activities with live feedback from the client
- Make sure the activities are built according to Industry Standards
- Ensure the SMEs working with me adhere to the guidelines and timelines for a smooth delivery
- Working with the Project Manager and ID to ensure a smooth functioning and delivery of the project

12/2019 – 12/2022
Bengaluru, India

Assistant Professor,

Jain(Deemed-to-be University); iNurture Education Solutions Pvt. Ltd

- Developing curriculum for **Blockchain Specialisation**
- Researching content around Blockchain Fundamentals; including **Golang and Solidarity**
- Handled **Python, Linux, Basic Electronics, Arduino, Embedded C, IoT System Design, Digital System Design, Micro-controller and Microprocessors, Analog Electronics Design, Signal Processing, and Fundamentals of Digital Electronics.**
- Conducted Multiple **Webinars** on **IoT, Embedded Systems, and their impact** in the assigned college and across colleges all over the country.
- **Recorded online lectures** for **Robotics, Embedded Systems, and Mobile Application Development**
- **Created** online content for LMS which included **PPTs, voice-overs, and SLMs**
- **Managing** a team that helps students to **build projects** and **encourages research**
- **Headed a team** for conducting **webinars, Faculty Development Program, and Tech Quizzes.**
- Handling the **Social Media** for the **BCA department** for Jain(Deemed-to-be University).
- **Managing online documentation**, and good hands-on experience with **Google Cloud services**

08/2021 – 08/2022
Mumbai, India

Software Consultant, Linchpin Analytics Collaborative

- **Debugging** the errors in their old platform based on **Python and Javascript**
- **Building a new platform** based on **Django Framework**

- Providing a helping hand to the CEO and CTO for **creating new solutions on their platform** for their clients
- **Helping the Engineers** to get on-boarded
- Managing the **git platform** for the whole company
- **Identifying loopholes** in the old platform to improve on the new platform
- Keep **up-to-date** with the **latest trends, technologies, and best practices in Mobile Application Development and AI**
- **Research and evaluate** new tools, frameworks, and libraries to **improve the development process and application performance.**
- Create and maintain technical documentation for mobile applications, including design documents, API documentation, and user manuals.
- Share knowledge and expertise with team members through presentations, workshops, and mentoring activities.

06/2021 – 12/2021
Mumbai, India

Tutor, SkillIT

- **Tutoring students** on **Artificial Intelligence** concepts through **online tutoring**
- Part of the team responsible to **develop the content** for the courses offered at the firm
- **Conducted seminars** for the parents and students interested in taking courses at SkillIT

08/2019 – 12/2019
Mumbai, India

Research Associate, uFaber Education Pvt. Ltd

- Built projects involved in the course for Robotics, IoT, Embedded Systems
- Developed curriculum for **one-on-one based online training** for **Coding** using **Scratch Platform**
- Developed curriculum for **one-on-one based online training** for **Robotics** using **Lego and Mechanix**
- Developed curriculum for **one-on-one based online training** for **Embedded Systems** using **Arduino**
- **Delivered online lectures** for the above-mentioned courses
- **Trained trainers** who were on-boarded for the said courses

06/2016 – 04/2019
Mumbai, India

Maker Coordinator, Consilience Learning

- Promoted **thrice** in the span of 8 months ==> Maker Enginner, Lead Maker Engineer, Maker Coordinator
- **Lead a team of 15** to develop, test, and implement the curriculum in various schools across India.
- Incharge of developing **hands-on engineering-based curriculum** for K-12 schools.
- Design, develop, and maintain mobile applications for various platforms such as **Android, iOS, and cross-platform frameworks like React Native or Flutter.**
- Collaborate with **UI/UX designers** to implement **responsive designs** and **create user-friendly interfaces.**
- Collaborate with cross-functional teams, including designers, back-end developers, and project managers, to deliver high-quality mobile applications.
- Developed and executed Curriculum for Hands-on Engineering across Schools in India; including **American School of Bombay, Heritage Experiential School, Delhi.**
- Focused on delivering information with real-world examples.

- **Built projects** to support the curriculum, which represented software, hardware, communication.
- Incharge of **Quality Assurance** of my team members
- Incharge of **train-the-trainers** for the firm.

SKILLS

Embedded Systems

- Robotics
- IoT
- Wireless Communication Protocols
- Analog Electronics
- Digital Electronics
- Signal Processing

GSuite

- Google for Education
- Google for Business

Web Frameworks

- NodeJS
- Django
- Spring Boot MVC
- ReactJS

Data Science

- Excel
- Power BI
- Analytics using Python
- Analytics using Power BI
- Visualizations with Python
- SQL
- numpy
- matplotlib

Networking

Cisco Packet Tracer

Gamification tools

- Puzzle Solver
- Quizizz
- No Hands
- Infographics

Database

- MySQL
- PostgreSQL

Programming

- Python
- Embedded C
- Java GoLang
- Solidarity
- C
- C++

Scripting Languages

- HTML
- CSS
- Javascript

Mobile Application Development

- React Native
- UI/UX Design Principles
- Android Development
- iOS Development
- Flutter
- Xamarin

PROJECTS

01/2024 – 04/2024

Process Flow to Submit Mobile Application Development Assignments

Developing a Process flow for online learners to submit their practical exams via github, with automated evaluation and grading

11/2023 – 12/2023

Notes Count and ToC

In an online learning environment, SME/Faculty needs to understand the quantum of words to be recorded while recording for a 20 hour course. This software will help the faculty understand how many words per slide is present and to be recorded. This software will also help create a ToC if there is an existing set of PPTs in order.

06/2023 – 11/2023	Transcriber Developed a software using Google's open API to generate transcript of a given video.
09/2023 – 10/2023	Powerpoint to Document Converter Developed an application to extract the text content present in the notes section and on the slides, with animation account(if any) of a whole presentation slide wise to a word document
01/2023 – 08/2023	Social Media Platform with Micro-Services A social media platform with a microservices architecture, where each microservice handles a specific task such as user authentication, profile management, feed generation, messaging, notifications, and analytics.
12/2022 – 06/2023	Recipe App Building a recipe app using ReactJS. The application allowed users to search for recipes, save favorite recipes, create shopping lists, and share recipes with others. I am also integrating a backend system using Ruby on Rails and MySQL to store and retrieve recipe data.
01/2023 – 03/2023	Personal Finance Tracker App Developed a mobile application using React Native to help users track their income, expenses, and savings. The app featured customizable categories, budget planning, and visual reports to analyze spending habits. Integrated Firebase for real-time data syncing and user authentication.
09/2022 – 12/2022	Weather App Built a weather app using ReactJS. The application displayed current weather conditions, temperature, wind speed, and other weather-related information for the user's location or any other location they choose. I also integrated a backend system using Django and PostgreSQL to retrieve weather data and store user preferences.
07/2022 – 09/2022	Fitness and Exercise App Created a fitness app using Flutter, which provided users with workout routines, nutrition plans, and progress tracking. Integrated a step counter and GPS tracking for outdoor activities. Enabled social sharing and goal-setting features to keep users motivated.
08/2021 – 12/2021	E-Commerce website with Micro-Services and Django Description: An e-commerce website with a microservices architecture, where each microservice handles a specific task such as user authentication, product catalog, shopping cart, payment processing, and order management.
05/2021 – 07/2021	Task Manager Application Built a task manager application using ReactJS. The application allowed users to manage their daily tasks effectively, with features such as adding tasks, setting priorities, marking tasks as completed, and filtering tasks by priority. I also integrated a backend system using Node.js and MongoDB to store and retrieve user data.

01/2020 – 05/2021

Automated Healthcare System

- Built the project to test out a hypothesis
- Implemented a basic network architecture for communication of medical devices in an ICU setup
- Data collection of the sensors was done by the sensors used in the medical industry
- All the data collected was displayed on the web dashboard which was created using Django framework
- Push Notifications could be sent to the Doctors treating the patient via the platform
- The finalization of the project is still ongoing
- Expecting to finish the project by August 2022

11/2020 – 02/2021

Mental Health and Meditation App

Created a mental health and meditation app using Flutter that offered users guided meditation sessions, stress relief exercises, and mood tracking features. Integrated a chatbot for daily mental health check-ins and personalized recommendations based on user's emotional state.

05/2020 – 06/2020

Cigarette Butt Crusher

- Project developed as a consultancy for ITC Bangalore through iii Creations and Biocrux Ltd.
- The system was developed on Raspberry Pi with the help of color sensors, motors, touch screen and IR sensors.
- It's a reward-based system that will send a link of rewards to the user based on the number of Cigarette Butts deposited.

08/2019 – 09/2019

Arduino Gameboy

- Built a Gameboy based on Arduino.
- Used LCD, and memory card reader to build the whole system.
- The body of the Gameboy was built using Lego

08/2019 – 12/2019

Wireless 3D Printer

- Developed a 3D printer from scratch using scrapped parts of PC's and Printers.
- Used Arduino Mega with Polulu Motor Drivers to build the 3D printer.
- Converted the wired transmission of data for printing to wireless using Bluetooth 4.0.
- Built an app to send the CAD files to the printer directly without the help of a laptop

09/2018 – 03/2019

Automated Traffic Management System with Pollution Control

- Proposed and Built the project in partial fulfillment of M. Tech.
- Built a system to detect pollution at any given traffic signal.
- Created an alert system using the IOT platform with IFTTT protocol to send alerts to the automated traffic police, so that the incoming traffic can be re-routed, as to reduce traffic and pollution at the signal.
- Built 4 autonomous Traffic Cops(robots), which will help manage the traffic at the signal, for the smooth movement of the traffic.
- Tried to implement push notifications with google maps, which would have helped Uber and Ola drivers to take an alternate route based on live data.

01/2016 – 03/2016

Secure Automobile Locking Systems

- Built the project as a hobby project
- Security systems were introduced which included fingerprint detection, and facial recognition
- A keypad was introduced which would be used after the fingerprint was detected and the user is given access to use the keypad
- Facial recognition will be done once the user enters the vehicle

06/2014 – 03/2015

Farmer Assistant Robot

- Proposed and Built a project in partial fulfillment of B.E
- 4 research-based robots provided by IIT Mumbai were programmed to collect data on a farm field and complete a set of tasks based on the data collected.
- Hardware used includes Firebird V, Zigbee Series 1, Sharp IR sensors, Line Following Sensors, and Camera.
- Techniques used to build the project: image processing using MATLAB, Ad-hoc network with Zigbee infrastructure, implementation of bounded deviation algorithm for the movement of the robot in a straight line.

EDUCATION

01/2021 – present
Bangalore, Karnataka,
India

Ph. D Computer Science Engineering, Jain(Deemed-to-be University)

01/2024 – present
Bangalore, India

M. A. Distance Education, IGNOU

06/2017 – 06/2019
Pilani, Rajasthan, India

M. Tech. Embedded Systems, BITS Pilani

06/2010 – 06/2015
Mumbai, India

B. E. Electronics, University of Mumbai
